What is Scrum Development Process?

Characteristics

- Self-organizing teams
- Product progresses in a series of month-long "sprints"
- Requirements are captured as items in a list of "product backlog"
- No specific engineering practices prescribed
- Uses generative rules to create an agile environment for delivering projects

Values:

- Openness – sharing ideas
- Focus – Task Oriented
- Commitment – Adhere to task completions
- Courage – Open to discuss the impediments and solutions
- Respect - Opinions
- Visibility – What and how

Sprint

HEXAWARE

- Scrum projects make progress in a series of "sprints". An iteration of work during which an increment of product functionality is implemented.
- Product is designed, coded and tested during the sprint
- Typical duration is 2-4 weeks or a calendar month at most
- The sprint starts with sprint planning. Many daily Scrum meetings occur during the sprint (one per day). At the end of the sprint we have a sprint review meeting, followed by a sprint retrospective meeting.
- During the sprint, the team must not be interrupted with additional requests. Guaranteeing the team won't be interrupted allows it to make real commitments it can be expected to keep.

Sprint Planning

HEXWARE

- Team selects items from the product backlog they can commit to completing
- Sprint backlog is created
 - Tasks are identified and each is estimated (1-16 hours)
 - Collaboratively, not done alone by the Scrum Master
- High-level design is considered

As a vacation planner, I want to see photos of the hotels.

Code the middle tier (8 hours)
Code the user interface (4)
Write test fixtures (4)
Code the foo class (6)
Update performance tests (4)

Daily Scrum

Parameters

- Daily
- 15-minutes
- Stand-up

Not for problem solving

- Only team members, Scrum Master, product owner, can talk

Helps avoid other talks

- Every one Answers 3 questions

These are *not* status for the Scrum Master

- They are commitments in front of peers

HEXAWARE

- 1 What did I do yesterday?
- 2 What will I do today?
- 3 Is anything in my way (Impediments)?

The Sprint Review

HEXWARE

- Team presents what it accomplished during the sprint
- Typically takes the form of a demo of new features or underlying architecture
- Informal
 - 2-hour prep time rule
 - No slides
- Whole team participates
- Invite the world

What Went Well What Could Have Been Improved Actions

Sprint Retrospective

- Inspect and Adapt
- team assesses the way they worked together in the sprint and identifies positive ways of working together that can be encouraged as future practice
- the team also identifies the things that could work better and develops strategies for improvement
- Whole team participates
 - Scrum Master
 - Product owner
 - Team
 - Possibly customers and others
